

ACCESSORIES

Mounting Pad

The Stuart Turner pump mounting pad provides additional sound insulation which further reduces the transfer of motor noise and vibration from a pump to the structure on which it is mounted.

Manufactured from dual density laminated layers to provide greater noise and vibration reduction.

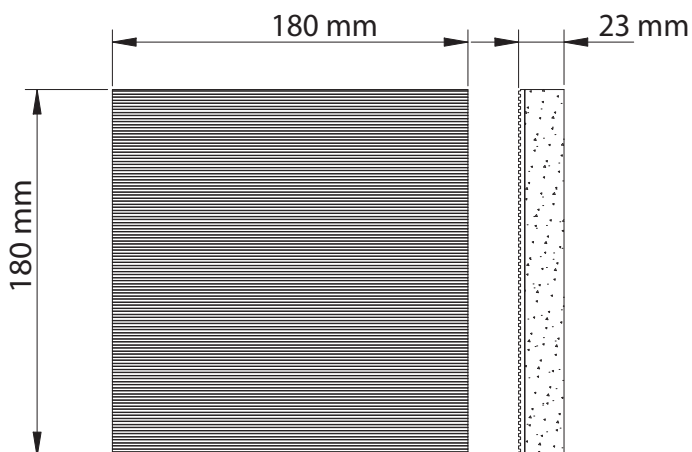

Features

- Dual density laminated construction
- Easy to install
- Durable

Application

- Minimises pump vibration noise transfer to surrounding structures
- Suitable for use with all Stuart Turner Monsoon and Showermate pumps
- Also suitable for use with Mainsboost Flomate MBF12 and selected Stuart pumps
